1. Introduction

The German National Library (DNB¹) started to publish the authority data of the Integrated Authority File (GND²) as Linked Data in 2010. Bibliographic data of the DNB and the German Union Catalogue of Serials (ZDB³) was added to the DNB's Linked Data service in January 2012. Since then the DNB data has been available in the format Resource Description Framework (RDF⁴) under "Creative Commons Zero" licence (CC0 1.0⁵).

The data from the German Music Archive has been converted along with the bibliographic data for the DNB's main collection (excluding the holdings in the German Exile Archive 1933–1945) and the serial resources (magazines, newspapers and monographic series in the German Union Catalogue of Serials). This document describes how the data is modelled.

The purpose of the procedure for selecting and modelling the data is to reference the bibliographic data of the DNB and the ZDB in RDF. The bibliographic records are not represented in their full complexity in RDF, rather specific elements have been selected for linked data representation which are required for identification of the resource.

The modelling follows the recommendations of the DINI WG KIM Bibliographic Data group⁶ V.2.0⁷. This working group consists of representatives of the library networks and a handful of large libraries in the German-speaking countries. It has set itself the target of harmonising the RDF representations of bibliographic data in the German-speaking countries. The DNB is playing a leading role in this process.

The KIM core element set has been implemented and further elements have also been included in the RDF representation of the data of the German National Library. Expansion to include further data sets is planned in later versions, meaning that at some point in the future the entire holdings of the German National Library will be available as Linked Open Data.

This documentation also shows which considerations have led to the current modelling, and highlights the potential areas for improvement and refinement in subsequent stages.

2. Namespaces

The vocabularies used are based on the recommendations of the KIM Bibliographic Data group for the core element set. The choice of vocabulary was made from widely available vocabularies which are already in use. It is evident to those involved that the vocabulary of existing ontologies does not always fit the requirements for representing the full depth of data structures.

For this reason, only existing vocabularies were used in order to facilitate pragmatic conversion of the bibliographic data. These are:

Vocabulary	Prefix	Expansion
BIBFRAME vocabulary with LC extensions	bflc:	http://id.loc.gov/ontologies/bflc/
Bibliographic Ontology	bibo:	http://purl.org/ontology/bibo/

3. Notes

3.1. Responsibility

This section covers statements of persons, corporate bodies, families and congresses which are carrying out a designated function in the context of a bibliographic resource. In the title data of the DNB and the ZDB these entities are usually identified by links to the GND. Therefore all properties used to establish these relations are applied as OWL Object Properties⁸. If no link to the GND is available but a literal name form it will be represented in a blank node.

⁸ <https://www.w3.org/TR/2004/REC-owl-ref-20040210/#ObjectProperty-def>

3.2. Publication

3.2.1. Statements of years

According to the KIM recommendation, the year of publication should have a specific datatype if the field content has four digits. The data source does currently not yet sufficiently validate that dates are present in this form. Therefore a specific datatype is currently not applied but datatype `xsd:string`.

3.3. Identification

3.3.1. Usage of property `umbel:isLike`

The identifiers which are documented in existing services can be referenced using “`umbel:isLike`”. This element indicates the high probability of a similarity yet (in contrast to the property “`owl:sameAs`”) is semantically so flexible that the selected modelling is not expected to cause any problematical consequences in using the data, as no absolute statement is made.

The identifiers are:

- | URN⁹
- | DOI¹⁰
- | Handle¹¹

3.3.2. “`owl:sameAs`” reference to culturegraph

The DNB bibliographic data referenced in culturegraph.org¹² are related by means of `owl:sameAs` to the local DNB record. Because the culturegraph record is generated from the DNB record it can be assumed that both the DNB record and the resulting culturegraph record describe the same object.

The DNB data is delivered at intervals to culturegraph, meaning that records with recent dates may not yet be identified through culturegraph.org, causing the reference to be temporarily unresolvable.

⁹ <https://www.dnb.de/EN/urnservice>

¹⁰ <https://doi.org/>

¹¹ <http://www.handle.net/>

¹² <http://www.culturegraph.org>

3.3.3. Identification of continuing resources

Serials are identified primarily by the Linked Data Service URI of the ZDB:
<https://ld.zdb-services.de/resource/<ZDB-ID>>

An "owl:sameAs" relation is created to the Linked Data Service¹³ of the Hochschulbibliothekszentrum des Landes Nordrhein-Westfalen (hbz¹⁴), lobid.org.

If a serial belongs in addition to the holdings of the German National Library, it is also identified by a URI of the DNB.

3.4. Titel

3.4.1. Series and serial statements and numbering

Hierarchical links to other resources or bibliographic units are represented by internal links between the source records (see also section "Linking"). These include e.g. links between parts of multivolume works to their superorders, or links between volumes of monographic series and the title of the series.

For the volume numbering (literal) it is evaluated whether the superorder is a periodical or a multipart monograph work and the suitable property is chosen accordingly: Issues of periodicals are given in the form of "bibo:issue¹⁵"; volumes of multipart monographs by "dcterms:bibliographicCitation".

In some cases there are multiple links, e.g. to a serial and to a superordinated work of a multivolume work. To make clear which title corresponds to which volume, the title of the superordinated work is also given as a literal in "bibo:issue" or "rdau:P60493"¹⁶.

Example:

`<https://d-nb.info/1030391726> rdau:P60493 "Bd. 6. Internationales Gesellschaftsrecht, grenzüberschreitende Umwandlungen" .`

¹³ <http://www.lobid.org/index-en>

¹⁴ <https://www.hbz-nrw.de>

¹⁵ <http://purl.org/ontology/bibo/issue>

¹⁶ <http://rdaregistry.info/Elements/u/P60493>

3.5. Publication

3.5.1. Publisher, place of publication and publication statement

The publisher and location of the publisher are shown as literals in separate RDF elements. If a publication is released by several publishers in different locations it is not then possible to assign a publisher to a location. In order to avoid such confusion in the event of multiple publishers and locations, they are also issued together in literal form with ISBD punctuation as complete publication statements (rdau:P60333).

Integration of the "Address book of the German book trade"¹⁷ into the GND has made it possible to include publishers' links. Where these are available, they are issued as URIs (marcRole:pbl) in addition to literals.

3.6. Content

Currently, all the implemented subject cataloguing elements are issued with the properties "dcterms:subject" or "dcterms:tableOfContents"; links to URIs are also provided.

3.6.1. DDC subject classes

The DDC subject classes of the Deutsche Nationalbibliografie are issued as literals of data type "dnbt:ddc-subject-category" using the property "dc:subject". Here only intellectually assigned subject classes are initially being considered and there is no differentiation between primary and secondary classes.

3.7. Provenance information

Media works are catalogued using both intellectual and machine-based processes. Information about the process used to generate specific metadata is expressed in the so-called metadata provenance. This is of particular interest for the subject cataloguing elements (dcterms:subject, dc:subject) in the bibliographic data. The provenance describes the process by which a GND subject heading is assigned to a publication (intellectual, machine-based with confidence value XY, etc.). It also encompasses the formal element "Language" (dcterms: language). This provenance information is modelled in accordance with the PROV Ontology and published in the form of a separate data dump. More information about the modelling of provenance information is provided in the DNB WIKI¹⁸.

4. Overview of properties

4.1. Annotations

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Note
rdau:P60470	Note on publication statement or on the commissioning body of the music production	Literal	^^xsd:string, @de	DMA	Applied to music releases of the German Music Archive. Contents are in German.
rdau:P60470	Details about recording event	Literal	^^xsd:string, @de	DMA	For music releases. As on the item. German Language
rdau:P60470	German translation of title proper	Literal	^^xsd:string, @de	ZDB	Applied until October 2015. Usually introduced by "Ubers.: ". Mostly used in ZDB-Ressources. German Language

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Note
rdau:P60470	Physical and technical details, note on illustrations	Literal	^^xsd:string, @de	DMA	Can contain: rotational speed of gramophone records (in rpm, i.e. "UpM"), SPARS Codes (e.g. DDD, ADD, ...), audio format (z.B. Mono, Stereo, Surround). Contents are in German
rdau:P60470	Note on physical description	Literal	^^xsd:string, @de	DMA	Contents are in German
rdau:P60470	General note	Literal	^^xsd:string, @de	DNB	German language
dcterms:description	Content note	Literal	Content note	DNB	e.g. track listings for audio resources.

4.2. Identification

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Note
bibo:isbn10	10-digit ISBN (without hyphens)	Literal	^^xsd:string	KIM-Kern	
bibo:isbn13	13-digit ISBN (without hyphens)	Literal	^^xsd:string	KIM-Kern	
bibo:issn	Authorised ISSN of the National ISSN Centre for Germany	Literal	^^xsd:string	KIM-Kern	
bibo:issn	ISSN on item	Literal	^^xsd:string	KIM-Kern	
bibo:gtin14	European Article Number (EAN)	Literal	^^xsd:string	DNB	
bibo:coden	CODEN	Literal	^^xsd:string	KIM-Kern	
umbel:isLike	Persistent Identifier: URN (Level0)	URI	https://nbn-resolving.de/...	KIM-Kern	
umbel:isLike	Persistent Identifier: Handle (Level0)	URI	http://hdl.handle.net/...	DNB	

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Note
dc:identifier	BNB-ID	Literal	^^xsd:string	DNB	Prefix (Uk)...
dc:identifier	Casalini Libri-ID	Literal	^^xsd:string	DNB	Prefix (ItFic)...
dc:identifier	BNF-ID	Literal	^^xsd:string	DNB	Prefix (FrPBN)...
dc:identifier	LoC-ID	Literal	^^xsd:string	DNB	Prefix (DLC)...
dc:identifier	OCLC-ID	Literal	^^xsd:string	DNB	Prefix (OCoLC)...
dc:identifier	Identifier of the Cooperative Library Network Berlin-Brandenburg (KOBV)	Literal	^^xsd:string	DNB	Prefix (DE-602)...
dc:identifier	Identifier of the North Rhine-Westphalian Library Network (HBZ)	Literal	^^xsd:string	DNB	Prefix (DE-605)...
dc:identifier	Identifier of Hessian Library Information System (hebis)	Literal	^^xsd:string	DNB	Prefix (DE-603)...
dc:identifier	Identifier of the South-West German Library Network (SWB)	Literal	^^xsd:string	DNB	Prefix (DE-576)...

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Note
dc:identifier	Identifier of the Bavarian Library Network (BVB)	Literal	^^xsd:string	DNB	Prefix (DE-604)...
dc:identifier	Identifier of the Common Library Network (GBV)	Literal	^^xsd:string	DNB	Prefix (DE-601)...
umbel:isLike	Persistent Identifier: DOI (Level0)	URI	https://doi.org/...	KIM-Kern	
schema:productID	Label, publisher or product number	Literal	^^xsd:string	DMA	Form: "<Labelname> (LC <Labelcode> <Number>" or "<Labelname> <Number> <Note>"
schema:gtin13	Universal Product Code (UPC)	Literal	^^xsd:string	DMA	13-digit number. 12-digit UPCs are extended by appending a leading digit zero.
dnbt:ismn	International Standard Music Number (ISMN)	Literal	^^xsd:string	DMA	Including hyphens

4.3. Content

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Note

dcterms:dateCopyrighted	Copyright notice date	Literal	^^xsd:string	RDA	format: YYYY or YYYY-YYYY
dcterms:issued	Date of publication or creation	Literal	^^xsd:string	KIM-Kern	Format: YYYY

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Notes
dcterms:issued	date range of publication or creation	Literal	^^xsd:string	KIM-Kern	Format: YYYY-YYYY
dcterms:issued	begin date of publication or creation	Literal	^^xsd:string	KIM-Kern	Format: YYYY-
dcterms:language	Language of text	URI	http://id.loc.gov/vocabulary/iso639-2/...	KIM-Kern	
marcRole:pbl	Music publisher	blankNode	_:node123 a mo:CorporateBody ; gndo:preferredName "..."; schema:location "...".	DMA	The music publisher is described in a blankNode with class mo:CorporateBody and properties gndo:preferredName and schema:place. Note: In contrast to the publisher name transported in parallel with dc:publisher this property points to the uniquely identified company that is obliged to submit deposit copies to the DNB.

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Notes
rdau:P60070	Date of distribution	Literal	^^xsd:string	RDA	format: YYYY or YYYY-YYYY
rdau:P60072	Date of Manufacture	Literal	^^xsd:string	RDA	format: YYYY or YYYY-YYYY
rdau:P60160	Place of distribution name	Literal	^^xsd:string		
rdau:P60162	Place of manufacture name	Literal	^^xsd:string		
rdau:P60163	Place of publication	Literal	^^xsd:string	KIM-Kern	
rdau:P60329	Edition statement	Literal	^^xsd:string	DNB	Whenever there is a statement of responsibility related to the edition, this RDF statement will be made. The designation of edition itself will always also be given with bibo:edition.

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Notes
rdau:P60330	Distribution statement	Literal	^^xsd:string	RDA, KIM-Erw	Concatenation of the values from separate statements with properties rdau:P60160, rdau:P60438 and rdau:P60070 to ease direct display. Only difference: the date of distribution is stated as on the item
rdau:P60331	manufacture statement	Literal	^^xsd:string	RDA, KIM-Erw	Concatenation of the values from separate statements with properties rdau:P60162, rdau:P60443 and rdau:P60072 to ease direct display. Only difference: the date of manufacture is stated as on the item
rdau:P60333	Publication statement	Literal	^^xsd:string	KIM-Kern	

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Notes
rdau:P60438	Distributor name	Literal	^^xsd:string		
rdau:P60443	Manufacturer name	Literal	^^xsd:string		
rdau:P60489	Dissertation or thesis information	Literal	^^xsd:string	KIM-Kern	Unstructured statement
rdau:P60489	Dissertation or thesis information	Literal	^^xsd:string	RDA	Concatenation of structured data. Form: <Type of academic publication>, <Granting Institution or Faculty>, <Year> There are plans to reference the first two information elements by URI in the future.
rdau:P60521	Note regarding publication	Literal	^^xsd:string, @de	DMA	

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Notes
rdau:P60521	Type of binding, delivery and access conditions (e.g. price)	Literal	^^xsd:string	DMA	For Musical Scores. This information is entered as free text. The data-base structure currently does not allow us to provide a granular representation of the information
rdau:P60521	Type of cover, delivery conditions and/or price, other information	Literal	^^xsd:string	DNB	This information is entered as free text. On account of the structure of the data-base it is not currently possible to provide a granular representation of the information

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Notes
rdau:P60521	Delivery conditions and/or price, other information	Literal	^^xsd:string	DMA	This information is entered as free text. On account of the structure of the database it is not currently possible to provide a granular representation of the information
rdau:P60527	Date of original (for reproductions)	Literal	^^xsd:string	RDA	format: YYYY
rdf:type	Single-volume part title of a multiple-volume complete work or a journal	URI	bibo:Document	KIM-Kern	
rdf:type	Single volume work, component part of a multivolume work or periodical; or integrating resource (excluding integrating online resources)	URI	bibo:Document	KIM-Kern	

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Notes
rdf:type	Multiple-volume part titles within a multiple-volume complete work	URI	bibo:Collection	KIM-Kern	
rdf:type	Multiple-volume complete work, not part title within a multiple-volume complete work or a periodical	URI	bibo:Collection	KIM-Kern	
rdf:type	Series	URI	bibo:Series	KIM-Kern	
rdf:type	Non-independent part (volume, issue) of a multiple-volume complete work or a periodical	URI	bibo:Document	KIM-Kern	
rdf:type	Issue of periodical	URI	bibo:Issue	KIM-Kern	
rdf:type	Periodical article	URI	bibo:Article	KIM-Kern	

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Notes
rdf:type	Component part of sheet music	URI	bibo:DocumentPart	DMA	Component parts are no longer actively indexed; the legacy data contains roughly 47,000 such entities
rdf:type	Component part of music release	URI	schema:MusicRecording	DMA	Component parts are no longer actively indexed; the legacy data contains roughly 180,000 such entities
rdf:type	Periodical or periodical-like series	URI	bibo:Periodical	KIM-Kern	
rdf:type	Periodical with individual volume listing (volume-based recording method)	URI	bibo:Periodical	KIM-Kern	
schema:albumReleaseType	Maxi Single (CD)	URI	schema:SingleRelease	DMA	

4.6. Title

Property	Object description	Object type	Objectdatatype / - value	Requirement source	Notes
bibo:issue	Cataloguer's title of the superorder ; Volume designation	Literal	^^xsd:string	KIM-Kern	Superorder is a continuing resource
bibo:issue	Differentiated declaration for the numbering	Literal	^^xsd:string	KIM-Erw	Applies to numbering of continuing resources. Format: <volume>.<reporting year>,<issue>,<numbering>
bibo:issue	Differentiated declaration for the numbering	Literal	^^xsd:string	KIM-Erw	E.g. for E-newspaper. Format: <reporting year>-<month>-<day>
bibo:issue	Title proper of the superorder ; Volume designation	Literal	^^xsd:string	KIM-Kern	Superorder is a continuing resource
bibo:issue	Series statement ; Volume designation	Literal	^^xsd:string	KIM-Kern	Superorder is a continuing resource
bibo:pageEnd	Page end	Literal	^^xsd:string	KIM-Kern	
bibo:pageStart	Page begin	Literal	^^xsd:string	KIM-Kern	

Property	Object description	Object type	Objectdatatype / - value	Requirement source	Notes
bibo:shortTitle	Short title (DIN 1502)	Literal	^^xsd:string	KIM-Kern	for journals
dc:title	Title proper	Literal	^^xsd:string	KIM-Kern	
dc:title	Titel of subseries, numbering	Literal	^^xsd:string	KIM-Kern	for continuing resources
dcterms:alternative		Literal	^^xsd:string	DNB	
dcterms:alternative		Literal	^^xsd:string	DNB	
dcterms:alternative	Parallel Title Proper	Literal	^^xsd:string	KIM-Kern	
dcterms:bibliographicCitation	Cataloguer's title of the superorder : Subseries ; Volume designation	Literal	^^xsd:string	KIM-Kern	
dcterms:bibliographicCitation	Cataloguer's title of the superorder ; Volume designation	Literal	^^xsd:string	KIM-Kern	Superorder is a multivolume work

Property	Object description	Object type	Objectdatatype / - value	Requirement source	Notes
dcterms:bibliographicCitation	Title proper of the superorder : Subseries ; Volume designation	Literal	^^xsd:string	KIM-Kern	
dcterms:bibliographicCitation	Title proper of the superorder ; Volume designation	Literal	^^xsd:string	KIM-Kern	Superorder is a multivolume work
dcterms:bibliographicCitation	Series statement : Subseries ; Volume designation	Literal	^^xsd:string	KIM-Kern	
dcterms:bibliographicCitation	Series statement ; Volume designation	Literal	^^xsd:string	KIM-Kern	Superorder is a multivolume work
dcterms:extent	Total page or track count	Literal	^^xsd:string	KIM-Kern	
dcterms:isPartOf	Series statement (unnumbered)	Literal	^^xsd:string	KIM-Kern	
dcterms:isPartOf	Series statement of the superorder	Literal	^^xsd:string	KIM-Kern	
rdau:P60054	Other characteristics for arrangements, transcriptions	Literal	^^xsd:string	DMA	For music

Property	Object description	Object type	Objectdatatype / - value	Requirement source	Notes
rdau:P60054	Other characteristics for selection, version, alternative	Literal	^^xsd:string	DMA	For music
rdau:P60493	Designation of volume and/or numbering as printed on work, title, other title information, undifferentiated text	Literal	^^xsd:string	KIM-Kern	
rdau:P60493	Titel of subseries / responsibility statement	Literal	^^xsd:string	KIM-Kern	
rdau:P60493	Other title information	Literal	^^xsd:string	KIM-Kern	
rdau:P60493	Other title information and statment of responsibility pertaining to whole item (for compilations)	Literal	^^xsd:string	KIM-Kern, Zusammenstellungen	related to the information in dcterms:title

4.7. Responsibility

Property	Object description	Object type	Objectdatatype / -value	Requirement source	Note
dcterms:contributor	Other creators, contributors, others (corporate body, conference)	URI	https://d-nb.info/gnd/...	KIM-Kern
